Faculty Position Search

Date: September 12, 2009

Position Title: Assistant/Associate Professor

Vacancy #: V- F24

Department: Earth and Environmental Studies

Job Description: Subject to Available Funding

The Department of Earth and Environmental Studies invites applications for a tenure-track Assistant or Associate Professor in Environmental Remediation. The successful applicant will play a pivotal role in further developing the PhD program in Environmental Management.

We are seeking a broadly trained environmental scientist specializing in remediation of the contaminated environment; a colleague who will complement ongoing environmental management research with areas of specialties including, but not limited to: phytoremediation, bioremediation, microbial ecology, plant-soil processes, and risk assessment. The successful candidate is expected to garner external research support.

Responsibilities for this position include teaching graduate and undergraduate courses such as Environmental Remediation, Environmental Risk Assessment, Environmental Biotechnology. Advising PhD students in Environmental Management and MA students in Environmental Sciences and Sustainability is required. Service to the department, university and larger professional community is expected.

Qualifications & Requirements: Candidates must have a PhD in Environmental Sciences or a related field. Post-doctoral experience is highly desirable. Evidence of peer-reviewed scholarship, potential success in grant activity, and potential excellence in teaching will be viewed favorably. Faculty rank will reflect the depth and range of the candidate's experiences.

Salary Range: Salary and range is dependent on qualifications.

Anticipated Start Date: September 1, 2010

Send letter and resume to (include vacancy # if above):

Send hardcopy that includes C.V., at least three professional references, statement of research interests, teaching philosophy with experience, and professional goals to:
